1985 - 1990

**Worked in Kuwait with Kuwait Entertainment city
and a few months with the Pepsi – Cola can making plant
And had to leave Kuwait due to the gulf war.**

An experienced, conscientious highly motivated Engineer with over 25 year's Mechanical and Electrical experience.

Dedicated to achieve results with high standard of quality and safety. Able to adapt quickly and effectively to different work environment and conditions, excellent in stressful and taxing circumstances. Goal is to unify any organizations department toward a new vision. My management style is to have every employee take full-ownership for their work. Core values involve encompassing safety, open communication, team work and accountability. These operating philosophies have signified me as an individual and a servant leader. I always strive to put my best effort into ensuring these philosophies are part of companies that I'm connected with both directly and indirectly. In past and present experiences, these operating philosophies have helped shaped the culture of the companies I've worked for. More importantly, these best practices can help transform companies into functional communities which is vital in ensuring organizations from the top to bottom move forward in this ever changing, diverse corporate world we live in today.
